ProCargo CT1

The new dimension of transport

Independent and fast

Sortimo will throw you into a new dimension of transport and mobility with its newest product. The cargo cycle ProCargo CT1 is characterised by its **brilliant cornering ability** made possible by its **patented tilting technology** and the unique integration of **load securing**. With the ProCargo CT1 Sortimo enables all service technicians, delivery services, bicycle couriers, municipalities and everyone involved in factory traffic, **a fast and healthy transportation option without having to worry about traffic jams and licenses**.

ProCargo CT1 - the perfect addition to your fleet

Use the ProCargo CT1 as an addition to your existing fleet. The demand for star shaped organised **hub and spoke systems** is higher than ever, especially in the **logistics, parcel and mail delivery** as well as express service sectors. Sortimo is the ideal partner here, because we offer you the right load securing and equipment concepts for your transporters from the warehouses to the hubs and ultimately facilitate the fast distribution to the recipients with the cargo cycles. The ProCargo CT1 is also the perfect partner for **service technicians, caretakers and interoffice mail deliverers** in the factory traffic.

*"An **innovative solution** for the highest of demands"*

"We have been searching for a future-orientated approach to mobility in large power plants like those of network providers for example and are happy that with the cargo cycle ProCargo CT1 by Sortimo we have found an innovative solution which meets our demands."

These concern the transportation possibility of tools on the one hand, but on the other hand also the high safety standards that we must comply within the company traffic."

Patrick Lausch,
Security Division Manager at ISS VSG GmbH

ProCargo CT1

Bring some power into your fleet

The **agile and powerful** cargo cycle with an electric motor is Sortimo's answer to the **mega trend of urbanisation**. Urbanisation will bring with it an increased demand for services in the urban area and transportation approaches which are as free of emissions as possible due to air pollution.

The logical consequence for this is switching to alternative motors and even new vehicle types. The ProCargo CT1 proves that this works because it combines the **loading capacity of a small commercial vehicle** with the agility and flexibility of a bicycle which stands out in the factory traffic.

ProCargo CT1 Pro

The ProCargo CT1 is available with a loading area length of 684 mm (width 2) and 922 mm (width 3).

Innovative tilting technology for perfect cornering ability.

280 kg permitted total weight

Gates Carbon Drive **belt drive** instead of a chain: maintenance-free, noiseless and clean.

The **hydraulic** Tektro Auriga Twin **disk brake system** won't let you down, even when the bike is fully loaded.

Front box for your cycle helmet, L-BOXX Mini and other accessories.

Comfortable to cycle thanks to **NuVinci Gears**: automatic, maintenance free.

Almost infinite range thanks to the 500 Wh **Bosch battery**.

LED headlights, which shine a wide and far-reaching light on even the darkest road (CNC-milled aluminium housing, anodised to withstand salt water, 100% water-proof, protected against theft).

Locking brake for safe parking in any position with the locking mechanism.

Unique: cargo cycle with **ProSafe load securing**.

ProCargo CT1 Eco

The ProCargo CT1 Eco is available with a loading area length of 684 mm (width 2) and 922 mm (width 3).

The Eco version includes gear shifting, Bosch Active Line Motor and a Busch & Müller AVY lighting system.

Subject to technical modifications.
